## EXPERIENCE

### Co-founder & Lead Developer

June 2023 – Present

*ES Solutions*

*Hamilton, ON*

- Co-founded a software services company providing software solutions to small businesses.
- Automated Google review requests for clients using AWS services such as Lambda, SNS, RDS, S3, Route 53, and CloudFront.
- Led the development of **Overload Pro**, an IOS mobile app for tracking progressive overload, and showcasing fitness portfolio, still under development.

### Founder & CEO

Jan 2024 – Present

*SKompXcel*

*Hamilton, ON*

- Founded and managed an academic assistance platform, handling all Google Cloud administration and Google Workspace for 4 contractors.
- Delivered tutoring services in Computer Science, Math, and Engineering to 10+ consecutive clients, specializing in LeetCode problems and mock interviews.
- Led technical interview prep focused on algorithms, data structures, and systems design.

### Software Developer Intern

May 2021 – Aug 2022

*Giftcash, Inc.*

*Remote - Hamilton, ON*

- Migrated a Python Django codebase to a microservices-based TypeScript NodeJS serverless architecture, improving system scalability by 15%.
- Optimized PostgreSQL APIs, reducing response times by 20%.
- Automated data extraction using Puppeteer, resulting in a 25% improvement in efficiency.

### Software Engineer Intern

June 2019 – Aug 2019

*SDI Labs*

*Garden Grove, CA, USA*

- Developed scalable web scrapers using Ruby on Rails and Docker for market research data collection.
- Optimized SQL database performance, reducing query times by 20%.

### Mixed Martial Arts Instructor & IT Administrator

Mar 2024 – Present

*Burlington Training Centre*

*Burlington, ON*

- Instructed adults and children in Wado Ryu Karate, promoting discipline and physical fitness.
- Managed IT systems, client outreach, and website administration, improving operational efficiency by 20%.
- Personal fitness trainer and Kickboxing coach.

## PROJECTS

### Spotify Stats Viewer | *Next.js 13, Spotify API*

Feb 2023 – Present

- Developed a responsive web application that connects to the Spotify API to display user data such as top tracks and genres.

### Overload Pro | *SwiftUI, iOS*

August 2024 – Present

- Developed an iOS app showcasing a personal portfolio with a progressive overload tracker for fitness goals.
