

Suleyman Kiani

Software Engineer · Fintech & Agentic Systems

Burlington, ON | +1 (289) 788-8260 | suley.kiani@outlook.com | linkedin.com/in/suleyman-kiani | github.com/kianis4 | suleyman.io

SUMMARY

Software engineer who builds the tooling a finance desk actually runs on: a quoting engine matching TValue to the penny, a booking-and-payments platform processing real client revenue, and a self-hosted agentic platform with sandboxed workers and fail-closed gates. Equipment-finance domain fluency from Mitsubishi HC Capital that most engineers don't have.

EXPERIENCE

Associate Account Manager (Internal Software Engineering)

Sept. 2025 – Present

Mitsubishi HC Capital Canada

Burlington, ON

- Rebuilt **13 abandoned Excel calculators** as one bilingual Next.js / React app covering **14 manufacturers**; reverse-engineered their lease and subsidy math, matched to the TValue schedules to the penny behind **450 automated tests**.
- Built an AI document-validation service (LLM extraction + deterministic rules) for deal-funding review: cuts the **1–2 hour** first pass to about **a minute**, advisory only, on a replayable per-deal audit trail.
- Designed the collections risk scorecard **approved for launch**: it ranks all **2,079 live delinquent contracts**, reordering **73%** of the top 100 versus a plain balance sort, on weights from a **six-year** delinquency history.
- Carry the desk's sales book: **\$4M funded against a \$2M monthly target**, over quota since month two.

Founder & Software Engineer

Jan. 2024 – Present

SKomp Studio

Remote

- Designed, shipped, and now run the studio's client platform, **Solstice Pilates**, solo: multi-tenant booking and payments (scheduling, waitlists, Square memberships) processing **\$40K+ CAD** across **850+ bookings** for 450+ registered users.
- Every change gates through **1,600+ automated tests** as required merge checks, with idempotent payment writes, webhook signature verification, and row-level tenant isolation underneath.

Junior Web Developer

May 2021 – Jun. 2022

Giftcash Inc.

Remote

- Migrated a legacy Python / Django monolith to Node.js on AWS Lambda and tuned PostgreSQL with indexes, caching, and query rewrites that killed the sequential scans behind the gift-card lookup flow.
- Automated balance verification with a Puppeteer + Axios pipeline; stood up Jenkins / GitHub Actions CI/CD.

PROJECTS

Personal Agentic OS · self-hosted agent platform | *Python, TypeScript, Claude, systemd, Tailscale*

2026

- Built and operate the agentic platform behind the document-validation service above: **30+ scheduled automations** and email-triggered workers replying in minutes, each sandboxed in a **kernel-namespaces jail** with fail-closed gates and cost circuit-breakers, containing prompt-injection risk from untrusted documents; an autonomous overnight pipeline builds and tests projects behind a **12-check eval gate**.

Mike Ross AI · legal RAG assistant (Delta Hacks 12) | *LangGraph, MongoDB Atlas, FastAPI*

2026

- Built a legal assistant answering Canadian-law questions with schema-enforced citations via a LangGraph state machine and jurisdiction-aware retrieval over a **16,000-chunk** corpus of seven Canadian statutes, with multi-turn thread memory and a draft-to-PDF pipeline for legal notices; live at mike-ross.ca.

TECHNICAL SKILLS

Languages: TypeScript, Python, SQL, Java, C, Swift

Financial & Domain: Equipment & lease finance, amortization & subsidy math (TValue-validated), credit scorecards

Backend & Web: Next.js, React, Node.js, Prisma, Tailwind, PostgreSQL (Neon), Redis, Vercel, TDD, CI/CD

AI / Agentic: Agent orchestration, LLM eval pipelines, RAG + local inference (Ollama), Whisper, prompt-injection mitigation

EDUCATION

McMaster University

Hamilton, ON

MEng, Computing & Software (Distributed Systems, Microservices & Applied ML)

Sept. 2025 – 2026

- A+** in Simple Type Theory and Microservices-Oriented Architectures; research with Dr. Farmer and Dr. Paige: TLA+/SMT2 verification of LLM citation faithfulness.

BASc (Honours), Computer Science

Sept. 2018 – Nov. 2024
